

## Layout drawing

Machine area make room for 1 m!

## Additional information

Weight of machine body: 1350 kg  
 (incl. tank and power supply unit)  
 Height of machine: 2100 mm

Requested minimum measurement for  
 entrance door/gate (WxH) 1500 x 2200 mm

1: Power supply  
 220-230V/AC 30 A

2: Water supply:  
 Single filling of the system with water, no regular  
 water connection is necessary.

3: Network connection

4: The erosion system should be set up to preferably consolidated  
 concrete floors on a suitable hard industrial ground. To the capacity  
 of MITSUBISHI possibly necessarily becoming shielding measures  
 do not belong in accordance with EMV guideline.
